

INFORMED CONSENT TO TAKE PART IN RESEARCH

(Suggested Use: Minimal Risk Research Involving Behavioral Testing)

Study Title:	Understanding How People Learn
Study Sponsor:	Association for Good Research
Principal Investigator:	John Smith, MD, Professor, Internal Medicine, UTHealth
Study Contacts:	Jane Doe, R.N., Research Nurse
Contacts:	Jane Doe: 713-500-0000

Introduction and Purpose: We would like you to consider taking part in research involving four computer tasks that help us understand how people learn. Eventually we hope to use similar tasks in research on how the brain works. You do not have to participate, and you can stop at any time without penalty.

Procedures: As part of this research, you will first be asked questions about your mood and anxiety level. This will take about 30 minutes. The four computer tasks will require you to interact with videogame-like screens and react to pictures, faces and sounds. Some of these things are intended to be annoying (like a car alarm) or bothersome (like a scary face).

You may take part in some or all four tasks. Completing all four tasks will take about three hours. You will be paid \$15 to \$75 depending on the number of tasks you attempt.

Confidentiality: All information we collect about you will be kept confidential to the extent possible. Please understand that research data without your personal identifiers such as name and address, may be shared with researchers outside UTHealth.

Questions: If you have questions about this study or need to report any problems please call 800-867-5309 and ask to speak to someone about the BLT study.

If you have any questions about your participation in this research, you can call the Institutional Review Board (IRB) at xxx-xxx-xxxx. The IRB is a committee that has reviewed and approved this research study (HSC-XX-XX-XXXX).
